Have you ever wondered exactly where your ancestor's land is located and what it looks like today? Have you wanted to go visit the homeland but cannot afford the trip? Google Earth can do this for you. Come and learn how to overlay historic maps onto satellite images of today, and make your source documents come to life as you find the locations and then walk the streets of the homeland without leaving your computer. Google Earth is an immensely valuable FREE tool and every genealogist should use it.

KayLynn Mathews is a member of the Association of Professional Genealogists, National Genealogy Society, Indiana Genealogy Society, and Northwest Indiana Genealogical Society. She has been researching genealogies since 1990 and is a family history consultant and past director of the Valparaiso Indiana Family History Center.
